Subject: Greenacres Landfill Site

Dear Mr. Thompson:

Last week I met briefly with John Roland of E&E to give him the site access consent and to discuss the timing for the initial work. I explained that as Mr. McCurdy's technical representative, I would like to stay fully informed of all matters having to do with your activities on the site. John apparently has no objection to maintaining a completely open line of communications. However, John pointed out that he works for the agency, and will need your approval.

Towards that end, I would appreciate it if you would inform E&E that they are free to discuss any aspect of the work with me, and in particular will keep me informed of the following:

1. When the drilling contractor will move on site with a drilling rig. Mr. McCurdy may want to have a representative there for the first few days.
2. Any contacts with the media having to do with onsite activities.
3. Any water quality data generated by the project whether it is in a completed report form or not.

Your cooperation in this matter is greatly appreciated.

Sincerely,

Bob Ely
Robert B. Ely
